Welcome to membership in the San Diego Astronomy Association!

The SDAA is an organization created for the purpose of furthering the education of its members and the public in astronomy and the related physical sciences. Membership is composed of people from all walks of life who share the same fascination for the Universe around them.

Magazines you subscribed to through the SDAA should start arriving within a month or two. All members receive an informative monthly newsletter, containing articles of interest, notices on SDAA events, and other information. Your first newsletter should arrive around the first of the month following the month in which your application was processed. The first line of the mailing label is coded and contains important information about your membership as follows:

- The first letter - "C" or "B" - indicates Contributing or Basic member status.
- A "+1" or "+2", indicates the number of Family members who joined with you, if any.
- The month/year indicates when your membership expires. No renewal notices are sent.
- If you are a Contributing member, the next number (4 digits) is the combination to the Tierra del Sol Observing Site gate locks, water and electricity, and the second number (5 digits) is the combination to the restrooms at the Site.

Each month, the SDAA holds regularly scheduled events. Program Meetings are held the third Wednesday of every month (except December and January) at 7:00 p.m. at the Mission Trails Regional Park Visitor and Interpretative Center. Directions can be found at their web site http://www.mtrp.org/visitor_center.asp. Topics are announced in the newsletter. On the first Wednesday of every month, SDAA members set up their telescopes East of the fountain by the Natural History Museum. In January, there is an Annual Banquet & Auction, and an Annual Bar-B-Cue is held at the TDS site each summer. Field trips and outings with other astronomy organizations are regularly scheduled throughout the year.

The SDAA has a phone answering machine (619-645-8940) which gives a brief description of the month's event. You may also leave messages, questions or comments, and a Board member will return your call. If you have a computer and modem, the SDAA has a web site : <http://www.sdaa.org>, where you can view past newsletters, and get the latest information about the club. We also have a Yahoo Group, for members, at <http://groups.yahoo.com/group/sdaa>. Our e-mail is: sdaa@sdaa.org

Enclosed is a map to the Tierra del Sol Observing Site and a list of the Site Rules for safe use of the site. The site is open to all SDAA members and the public on two Saturday nights each month closest to the Last Quarter and New Moon. The newsletter lists the exact dates for each month. In addition, Contributing members may use the Site whenever the wish.

Happy Observing!

BY-LAWS OF SAN DIEGO ASTRONOMY ASSOCIATION

Article I – Membership and Dues

Section 1.0 -Membership Application

Applications for membership shall be made to the Board of Directors who will review each application within 45 days of receipt. No application shall be considered unless accompanied by all dues applicable, which shall be returned if the application is not accepted.

Section 2.0 -Classes of Membership

A. Basic Member C. Associate Member (Under 18 years old) E. Honorary Membership
B. Contributing Member D. Family Member

Section 3.0 -Privileges Of Membership

Except as noted elsewhere in this article, privileges of membership shall include the right to vote, hold office and attend board meetings. Other privileges include the use of the library and other club equipment and facilities, and other such privileges as may be designated by the Board of Directors.

3.1-Basic Member

This class of membership includes those privileges as described in 3.0.

3.2 -Contributing Member

This class of membership has all the privileges as noted in 3 .0, plus unlimited access to the club observing site, as well as other privileges as designated by the Board of Directors outlined in the Operational Procedures.

3.3-Family Member

This membership is available to a person who is in the immediate family of a Basic or Contributing Member. This membership has the same rights and privileges as the Basic Membership.

3.4 -Associate Member

This membership is available to persons under the age of 18 and is granted by the Board of Directors under conditions of special circumstances. An associate member cannot serve as an officer of the corporation.

3.5 -Honorary Member

An honorary member is a distinguished member of the astronomy community, who by virtue of their standing in their field, brings considerable talent and expertise to the association. An honorary member shall have all the rights and privileges of a Contributing Member, except that no honorary member may hold office.

Section 4.0 -Voting

Each member shall have only 1 (one) vote, regardless of class.

Section 5.0-Dues

The annual dues shall be established by the Board of Directors, and outlined in the Operations Procedures. The annual dues structure shall be arranged to allow operation of the Association in a fiscally responsible and solvent manner, at the same time retaining the smallest fees possible.

Section 6.0 -Payment of Dues

Dues shall become due and payable on the annual anniversary date of first joining. Any member whose dues are delinquent for more than 60 days shall automatically be terminated from membership.

Article II – Officers and Their Election

Section 1.0 -Officers

The officers of this corporation shall be President, Vice–President, Recording Secretary, Corresponding Secretary and Treasurer. They shall be members in good standing and shall be 18 years or older at the time of taking office.

Section 2.0 -Election of Officers

Officers shall be elected annually. If there is but one nominee for any office, their shall be a motion before the Board of Directors that the Recording Secretary cast the elective ballot of the organization for the nominee.

Section 3.0 -Terms of Office

Officers shall assume their duties at the January membership meeting of the corporation. Officers shall serve for a term of two years or until their successors are elected. Terms of office shall be staggered; with the President, Vice–President, and Corresponding Secretary elected together biannually on even years and the Recording Secretary and Treasurer elected together on the alternate intervening years.

Section 4.0 -Term Limits

A person shall not be eligible to serve more than two consecutive terms in the same office.

Section 5.0 -Nominating Committee

There shall be a nominating committee consisting of three members, one of which shall be elected by the Board of Directors from its body, and two elected by the membership at the regular meeting in October. The President shall appoint one of the three to serve as Chairman of the Committee. The purpose of this committee is to solicit and accept nominations for the position open to election.

Section 6.0 -Nominations

The nominating committee shall solicit nominees for each office to be filled and report at the regular membership meeting in November. Following the report of the Nominating Committee, an opportunity shall be given for final nominations from the floor.

Section 7.0 -Ballots

The Board of Directors shall submit each office for which there is more than one nominee to all the voting members by mail ballot. The candidate receiving greatest number of votes shall be elected to office.

Section 8.0 -Nomination Eligibility

Only those who have consented to serve, if elected, shall be eligible for nomination, either by the committee or from the floor.

Section 9.0 -Office Vacancy

A vacancy occurring in any office shall be filled by an appointee designated by the Board of Directors. The appointee shall hold the position until the next election.

Article III – Duties of Officers

Section 1.0 -President

The President shall preside at all meetings of the membership and of the Board of Directors, shall appoint the chairmen of standing and special committees, shall coordinate the work of the officers and committees in order to promote the purposes of this corporation, and shall, with the Recording Secretary, when properly authorized, execute all legal documents in the name of the corporation.

Section 2.0 -Vice-President

The Vice-President shall act as aide to the President, shall perform the duties of the President in his absence or inability to serve, and shall be ex-officio chairman of the Program Committee.

Section 3.0 -Recording Secretary

When required, the Recording Secretary shall record the minutes of all membership meetings and all Board of Directors meetings, shall be the custodian of the official copy of Articles of Incorporation and By-Laws, shall, with the President and properly authorized, execute all legal documents in the name of the corporation, and shall perform such other duties as may be delegated to the Recording Secretary. Minutes of all meetings of the Board of Directors and membership shall be read at the next succeeding meeting.

Section 4.0 -Corresponding Secretary

The Corresponding Secretary shall keep the correspondence records of the organization and prepare and send such communications as may be authorized by the membership or Board of Directors and shall perform such other duties as may be delegated to the Corresponding Secretary.

Section 5.0 -Treasurer

The Treasurer shall receive all moneys of the corporation, shall keep an accurate record of receipts and expenditures including the official Membership Book and Dues accounts, and shall disburse treasury funds for all obligations of the corporation provided they are incurred in accordance with the provisions of the Articles of Incorporation and By-Laws. The Treasurer shall present a financial statement when requested by the Board of Directors. An annual report shall be available to the membership. The Treasurer's accounts shall be examined annually by an auditing committee of not less than three members who, satisfied that the Treasurer's annual report is correct, shall sign a statement of that fact at the end of the report. The Auditing Committee shall be appointed by the Board of Directors.

Section 6.0 -Leaving Office

All officers shall deliver to their successors all official corporation records and property by the first business meeting in January following their election.

Section 7.0 -Absences

The position of any officer who is absent from three successive membership and/or Board of Directors meetings shall be declared vacant unless such absence is excused by the Board of Directors .

Article IV – Meetings

Section 1.0 -Schedule

Regular meetings of this organization shall be held at such place and time as may be determined by the Board of Directors.

Section 2.0 -Special Meetings

A special membership meeting of the organization may be called by the Board of Directors, but only after five days written notice to each member of the time, place and purpose of such a meeting has been given. Such a special membership meeting shall be limited to the transaction of business directly related to the stated purpose.

Section 3.0 -Quorum

A quorum of members shall consist of at least one officer present to conduct the meeting plus at least 10% of the members at any regular meeting or special business meeting of the organization, provided that a quorum shall constitute no less than 7 members. This section does not pertain to regular meetings of the Board of Directors, who shall meet at least once each month.

Section 4.0 -Eligibility to Participate

The privilege of being nominated to or holding office, introducing motions, debating and voting, shall be limited to members of the organization whose dues are not delinquent.

Article V – Board of Directors

Section 1.0 -Duties

The Board of Directors shall direct the affairs of the Corporation and determine its policies insofar as may be consistent with these By-Laws and to the extent authorized or permitted by law.

Section 2.0-Composition

The Board of Directors shall be composed of nine (9) members and shall consist of the five (5) officers of the corporation and four (4) directors elected from the membership.

Section 3.0 -Directors Terms of Office

Directors other than the officers shall be elected for one (1) year at a time and under the conditions prescribed for the regular election of officers.

Section 4.0 -Quorum of Directors

A quorum of the Board of Directors shall be four, provided at least two officers are present and one of those is either the President or the Vice President.

Section 5.0-Dues Structure

The Board of Directors shall have authority to raise membership dues if and when necessary to cover increased cost of publications, correspondence, postage, and other operating expenses.

Article VI – Committees

Section 1.0 -Appointment of Committees

The Board of Directors shall appoint, when necessary, standing committees of the Corporation.

Section 2.0 -Appointment of Members

The chairmen of standing committees may appoint any member of their choice to serve on their respective committee.

Section 3.0 -Terms of Committees

Special committees may be created at any time by the membership at any meeting of the Board of Directors. Unless otherwise ordered, special committees shall be appointed by the Board of Directors for a specific purpose and expire automatically at the conclusion of their mission.

Section 4.0 -Presidential Membership

The President shall be an ex-officio member of all committees except the Nominating Committee.

Section 5.0 -Revocation of Appointment

The Chairman and membership of any standing or special committee may have their appointments revoked by action of the Board of Directors.

SAN DIEGO ASTRONOMY ASSOCIATION RULES FOR THE TIERRA DEL SOL OBSERVING SITE

These rules are intended to provide access and use of the San Diego Astronomy Association property for as many members and guests as possible, yet permit each person to pursue the study and enjoyment of astronomy to their fullest satisfaction.

Access to the property is a privilege of membership. All members and guests are required to abide by the rules outlined below and to conduct themselves in a dignified and orderly manner at all times. Violations will be handled by the Board of Directors and the Site Host. Violations could result in ejection from the property, loss of privileges, or dismissal from the SDAA.

1. Access to the property will be by combination only, except during regularly scheduled public viewing nights (Star Parties). Members are responsible for their guests.
2. Everyone is responsible for their own litter. If you bring it in, take it out!
3. No open fires are permitted without Board approval and a State forestry burning permit. Bar-B-Cues are permitted only in the posted, designated areas and shall not be left unattended. Smoking is permitted only in private vehicles, with doors and windows closed, or in the Southeast corner (near restrooms) or Northwest corner of the public parking area.
4. Members and guests shall use only the minimum light necessary for safety, and light should be red or masked in red to preserve night vision. Lights shall be kept pointing towards the ground whenever possible. Check and be sure it is clear to use lights before proceeding in or out of any area. Be considerate of others and their night vision and photography efforts.
5. Noise shall be kept to a minimum. No loud music, CB's, horns, yelling, etc., especially between the designated quiet hours of 8:00 p.m. and 10:00 a.m.
6. Dust shall be kept to a minimum. With the exception of handicapped persons, the use of any wheeled vehicle, bicycle, or motorized vehicle is prohibited, except to go to and from your observing area. Speed limit on the property is 5 MPH.
7. Discharging of firearms is prohibited.
8. Removal of brush, trees, or any other flora and fauna must be approved by the Board of Directors.
9. The last Contributing member to leave the site is responsible for turning off all lights, power and water, securing all equipment, assuring no others are on the property, and locking all doors and gates.
10. On official public star party nights, the Board will appoint a host(s) to be responsible for the enforcement of the rules, and the operation of the property during the observing session. Their duties will be defined by the Board and the appointment rotated among the Contributing members.
11. On non star party nights, guests must be accompanied by a Contributing member.
12. All pets must be controlled by a leash at all times. Owners are responsible for the actions of and their pets and for cleaning up after their pets.

**SAN DIEGO ASTRONOMY ASSOCIATION
RULES FOR THE TIERRA DEL SOL OBSERVING SITE
(Continued)**

13. Parking in the public pad area shall be on the north side of each pad. Guests shall park their vehicles in the areas designated for parking, and not along the public pads or in the accesses to the private pad areas. Public Pad access is on a First Come, First Served basis, no reserving or "Saving" of spots is allowed. Physical space used on the Public Pad should be kept to a maximum of the width of your vehicle plus 18" to each side. If, conditions warrant, more space may be used, but only after observing has begun.

14. Groups, either students or friends of members, larger than 8 in number, must be approved by the Board of Directors, prior to their visit. All groups, of any size, must abide by the above rules, must arrive before dark and must have a prearranged departure time. The group MUST be instructed in white light etiquette before the night of the visit. Regardless of the night of the visit, weekdays or non-star party weekends, these rules must be strictly obeyed. Failure to comply with these rules will be punishable, as deemed necessary, by the Board of Directors.

The above rules are general guidelines for conduct on SDAA property. All members and guests must be considerate of the other members and shall conduct themselves accordingly. Courtesy and common sense are the keys to successful and enjoyable group observing. Each person must help in protecting the property and equipment of the Club. Help keep operating and maintenance costs to a minimum by prudent use of the site, observance of the rules, and by reporting to the Board or host violations or other problems as they occur.

In addition to these rules, all County, State, Federal, and Forestry Laws are applicable, shall be observed and are enforced.

**SAN DIEGO ASTRONOMY ASSOCIATION
RULES FOR RECREATIONAL VEHICLE (RV) USE
AT THE TIERRA DEL SOL OBSERVING SITE**

These rules are intended for Recreational Vehicle (RV) use on the San Diego Astronomy Association property. It is the intent of the Board of Directors to provide for as many members and guests as possible, yet permit each person to pursue the study and enjoyment of astronomy to their fullest satisfaction.

Access to the property is a privilege of membership. All members and guests are required to abide by the rules outlined in the San Diego Astronomy Association Rules for the Tierra del Sol Observing Site, and those members bringing RV's onto the site must abide by this set of rules in addition to the Rules for the Tierra del Sol Observing Site. Violations will be handled by the Board of Directors and the Site Host. Violations could result in ejection from the property, loss of privileges, or dismissal from the SDAA.

1. RV parking is limited to the northwest corner of the Tierra del Sol Observing property. An area on the property will be demarcated for RV use, and parking or placing an RV in any other area is not permitted. The private fenced observatory area is excluded from this rule and owners and guests of observatory owners may park their RV's next to their observatory.

2. The number of RV's allowed on the property at any given time will be limited to the number of RV's that will fit in the demarcated area. The area of demarcation overlaps the area set aside for tent camping, and tents will have priority over the use of the area. RV parking is on a first-come, first-serve basis. RV's arriving after the demarcated area is filled must park off the property (and subsequently under the rules and guidelines of the BLM or property owners). RV's which park off the Tierra del Sol Observing property and are in the vicinity for SDAA functions or to use the Tierra del Sol Observing property must follow this set of rules.

3. RV's are not allowed to hook up to Tierra del Sol Observing property electricity or water, nor are they allowed to dump any waste material on the Tierra del Sol Observing property. Electrical and water operations must be self-contained, and not trespass onto the Tierra del Sol Observing property. Generator operation is not allowed on the Tierra del Sol Observing property during the quiet hours specified in the Rules for the Tierra del Sol Observing Site or if it interferes with the peaceful enjoyment of the site.

4. RV's will provide full shielding from light trespass. Complete red lighting is preferable, but other forms of light block are acceptable. No white light will trespass onto the Tierra del Sol Observing property at any time from an RV, including when a door, window or vent is opened.

5. RV's will not provide any form of view block to any observer on the Tierra del Sol Observing property, nor will an RV provide any form of disturbance to any observer on the Tierra del Sol Observing property.

6. The SDAA Board of Directors, or its appointed representatives, will have sole discretion in judging when a vehicle is considered an RV and must adhere to the above rules. The SDAA Board of Directors, or its appointed representatives, will also have sole discretion in controlling the use of RV's at the Tierra del Sol Observing property.

Observatory Training & Use Policy

This document presents policy for the training and use of the San Diego Astronomy Association's Observatory and the 22" Lipp Telescope.

Training

Training is open to all members of the club and the general public. The Association will hold training classes at the observatory when enough interest warrants a class. Date, time and curricula of the class shall be at the discretion of the acting Observatory Director. No person shall be denied participation in a training class, in concordance with our educational mission. However, size of a class may be limited due to the constraints of teaching in the small environs of the observatory. In instances where class size must be limited, preference will be given to 1) Contributing Members who meet the requirements outlined below; 2) other members not meeting the requirements outlined below; and 3) the general public, in this order. Participants not able to attend a class will be placed on a waiting list for the next class.

In order to use the Association's observatory and the telescope, members must be trained in its use and operation. The training class' intent is to familiarize users with the specific operational functions of the observatory, and not to train them in telescope operations. The following requirements must be met in order for members to be authorized to use the observatory and telescope. The member must:

- 1) Be a Contributing Member of the Association in good standing for at least one year.
- 2) Demonstrate working knowledge of an equatorially mounted telescope.
- 3) Demonstrate working knowledge of the attachment and use of telescope accessories, such as diagonals, eyepieces, finders, filters, and other common attachments to optical telescopes.
- 4) Possess rudimentary mechanical skills for simple machine operations at the observatory.

Use

Once a member is trained, they can reserve the telescope for personal use, as long as the following provisions are met:

- 1) The member must host one public observing session at the observatory within six (6) months of completing the training class.
- 2) After the hosting requirement is met, members must use the observatory at least once per year in order to remain on the active user list. Members not meeting this requirement must retake the training class before being allowed to use the observatory again.
- 3) After the hosting requirement is met, members can reserve any open night except the Saturday nights of the public star parties at Tierra del Sol (two nights a month), and the Friday night preceding the Saturday night public star parties. This Friday night is automatically reserved for the star party host's personal use.

All other nights are available for reserving the observatory for personal use. The procedure for reserving and using the observatory is as follows:

- 1) Contact the Observatory Director to reserve the desired date. The Observatory Director will confirm its usability on the desired date. Reservation is on a first-come first-serve basis.
- 2) The Observatory Director will supply the member with the combinations to the observatory, which regularly change to ensure security and control of the observatory.
- 3) The member will report back to the Observatory Director any problems or concerns with the observatory. No member is to make repairs, corrections, modifications, or to perform any work on the observatory, the telescope, or equipment without the express permission of the Observatory Director or the Board of Directors.

This policy is set forth in order to assure the SDAA's control of and the use of the observatory. The SDAA reserves the right to modify this policy at any point and without notice to the membership. Any member not complying with the policy as set may lose use privileges of the observatory, and will only be reinstated at the discretion of the Observatory Director and/or the Board of Directors.

Frequently Asked Questions

Q. When are star parties at TDS held?

A. Star Parties are held 2-3 times a month on Saturday nights. The Saturday night closest to new moon is usually considered “Member” night, while the Saturday before or after this night is for members and general public. Check the club web page, Yahoo Group, or the back of this handbook for star party dates, or check a calendar with moon phases for the Saturdays closest to new moon.

Q. I’ve never been to TDS, is it hard to get to?

A. No, just follow the map in this handbook. It is highly suggested that upon your first trip to TDS, that you try to arrive in the daylight hours. It’s much easier to find in the daylight and if you leave at night, easier to find your way out.

Q. I don’t own a scope, can I still come to TDS?

A. Yes. Coming to a TDS star party gives you an opportunity to look through many different types of telescopes and talk to their owners. Every amateur astronomer is proud to let you look through his scope and more than willing to tell you about it. In addition, there are “loaner” scopes available for you to use at the star parties. See our Observatory Director, Jim Traweek, about checking out one of the loaner scopes.

Q. I’m going to TDS, with my scope, for my first star party, what should I bring with me?

A. A red light flashlight is highly recommended. You can make one yourself, with the instructions and filter material provided in this handbook, or purchase one from many of the Astronomy Shops in town or on the web. If your scope can use AC power, then bring an extension cord and maybe an outlet strip, you may not be able to park right next to one of the outlet boxes on the public pads. The public pads are made of concrete, and some members bring a piece of outdoor carpet to put their scope on, especially if they have to kneel down to use it, it’s much softer on your knees. A folding chair is also nice to have, you can get very tired standing all night. If you use charts or reference books, then a folding camp table is also recommended. We suggest that you keep your table and chairs off the pad and on the dirt, saving as much room as possible for telescopes on the concrete. Patience, lots and lots of patience. Your first night at a dark sky site can be overwhelming so don’t be afraid to ask questions of other members. There’s no such thing as a dumb question, not asking questions is the only dumb thing you can do.

Q. What other events does the club have besides star parties?

A. Once a month, the club holds its Program Meeting. The program is different each month and starts with an announcement of recent events and news about the club. The Program Meeting is held at the Mission Trails Regional Park Visitor Center at 7:00 PM on the third Wednesday of each month. Directions are at the MTRP website at http://www.mtrp.org/visitor_center.asp. There are no program meetings in December or January. On the first Wednesday of the month at 7:30 PM the “Stars in the Park” event is held in Balboa Park East of the fountain next to the Natural History Museum. The second Friday of each month we have “Stars at Mission Trails” at the campground at MTRP. At both these events, members set up their scopes and show the public the night sky. The club also has an annual banquet in January and an annual barbecue in the late summer, watch your mail and newsletter for details. If you want to donate labor, there are occasional “Work Parties” at TDS where everyone chips in to help build new features or maintain existing structures (painting, weeding, cleaning). These too are posted in the SDAA Group email, SDAA web page and in the newsletter.

Q. My spouse doesn’t enjoy astronomy but likes to come along and read, what can he/she do?

A. The building that houses the club scope also has a heated “Warming Room” where non-astronomers can go to read, knit, or sleep if necessary. The light in the warming room is a soft red color, so as not to be too damaging to observers’ night vision, but is bright enough to read by. There is also a coffee pot and a microwave there for members use. This is also the location of the library, where many astronomy related books and magazines are kept.

Q. My car has “automatic” headlights, and I know white light is bad, what do I do?

A. Look at your dashboard carefully, most “automatic” headlights have a switch that allow you to turn the feature off, as well as manual “on” positions. Turn it to the off position before you turn the ignition on to leave. If your car has the daytime “running lights” which can’t be turned off, either find the fuse to disable these lights, or tape some cardboard over the lamps until you are away from the site and can remove them. One suggestion that has been found to work on newer Ford and GM vehicles is to put the emergency break on, just a bit (one or two “clicks”). This seems to disable the daytime running lights, and won’t hurt your breaks. Just remember to take the break off, once you are away from the sight. Don’t overlook your interior “dome” lights, you’d be surprised at the amount of light these produce when your eyes are dark adapted. If your car has the feature to turn them off, do so, otherwise, most members pull the fuse for these before coming to the site. If all else fails, pull the bulbs from the sockets or put a piece of cardboard over the offending lamps.

Q. When I leave, can I turn on my “Parking Lights” to help see?

A. If you absolutely have to, then do so, but if at all possible, get someone to walk in front of you with a red flashlight to light the way for you, even the bright amber light from “Parking Lamps” can ruin a person’s night vision.

FAQ's Continued

Q. Can I smoke at Tierra Del Sol?

A. Smoking is only allowed in your vehicle, with windows and doors closed, and in two designated "Smoking Areas". One is in the Northwest Corner of the public parking area and the other in the Southeast corner, near the restrooms. Look on the map of the Tierra Del Sol site for the circled smoking areas.

Q. What is the difference between a "Basic Member" and a "Contributing Member"?

A. A "Basic Membership", at \$30.00 a year, receives the newsletter, and can use the facilities at Tierra Del Sol on Star Party nights. A "Contributing Membership", at \$50.00 a year, receives all the benefits of Basic Membership, plus, can lease a private pad, can use the facilities at Tierra Del Sol at any time, and can be trained and use the club 22" scope.

Q. How do I get a "Private Pad"?

A. Private pads are obtained on a first come, first served basis, by applying for one to our "Private Pad Director". Your name will be put on the bottom of the list, the member at the top of the list will get the next available pad, and he/she is taken off the list. Private pads must be used, by the lessee, at least four times a year, in order to maintain their lease. Once you obtain a pad, you will be given the rules for it's use by the Pad Director. The club is endeavoring to make more pads available, and some members are willing to share their pad with others. See the map of pad owners willing to share their pad at the following URL: http://www.sdaa.org/_docs/_tds/TDS_PadSharersMap.pdf. The Private Pad Director can be reached at pads@sdaa.org or at star parties.

Q. I'm a Contributing Member and want to use the site on a night other than a Star Party night, how do I open up?

A. To open the site you'll need the combination that appears on your monthly newsletter. This combination will open the main gate locks, the lock on the pump, the lock on the power switch and the gate lock to the warming room. The combination to the warming room door and the restroom doors is also on the label. It's suggested that you have a Board member or the "New Member Mentor" give you a tour showing the location of the pump and electrical boxes before your first visit by yourself. Once you enter the site, it is suggested that you lock the gate behind you, to keep unauthorized people from entering the site. When you are through at the site, make sure that you are the last person leaving (check the observatory buildings too), before turning off the power and pump, and make sure that all doors are locked and that the combination locks are on securely and the combination numbers are spun. Don't forget to take away any trash that you might have created in the bathrooms or around your site.

Q. How do I get to use the 22" club scope?

A. To use the club's 22" telescope, you must read and understand the Observatory Training & Use Policy, in this handbook. If you meet the criteria spelled out in the policy, have completed the training and have "Hosted" the scope at least once within six months of your training, you may use the club scope.

Q. What is "Hosting the scope"?

A. The club scope is "Hosted" at the Saturday star party nights by a member who has been trained to use it. That member will spend the evening at the scope and guide it to objects to share with the people that come to look through it.

Q. How is space allocated on the public pads on Star Party nights?

A. Use of the public pads is always on a First Come, First Served Basis. There are no "personal spots" or areas designated for special purposes. The reserving or "Saving" of a spot for someone is not allowed. The maximum space allowed for your use is the width of your vehicle plus 18" on each side. If, conditions warrant, more space may be used, but only after observing has begun.

Q. Is the magazine subscription (Sky & Tel and/or Astronomy Magazine) a good deal for members?

A. Yes, the savings over the regular subscription rate is \$10.00 for Sky and Telescope and \$10.95 for Astronomy Magazine.

Q. My magazine subscription renewal for Sky & Telescope (or Astronomy), just came in the mail, what do I do with it?

A. This is a reminder, for most members, that their membership is about to expire. You don't need to do anything with the renewal card from the magazine, but you can forward it to the club, along with your renewal application, if you wish. If you don't want the subscription to continue, make sure you leave the boxes unchecked on the renewal application, and your subscription will cease.

INSTRUCTIONS TO SAN DIEGO ASTRONOMY ASSOCIATION'S TIERRA DEL SOL OBSERVING SITE

1. Go East on Interstate 8. The distance to go is dependent upon where you get on at, but it's about 58 miles from Interstate 5.

2. Take the "Crestwood / Live Oak Springs" exit and turn right at the stop onto "Old Highway 80".

3. Go Southeast on "Old Highway 80", past the Golden Acorn Casino, approximately 4.2 miles and turn right onto "Tierra Del Sol Road" at the crest of the hill.

4. Go South on "Tierra Del Sol Road". You have to cross "Highway 94" 300 yards after turning onto "Tierra Del Sol Road". Continue South on "Tierra Del Sol Road".

5. You'll pass through the small community of Tierra Del Sol approximately 3.5 miles from "Old Highway 80". The road will then cross some railroad tracks (when you cross the tracks you are almost there). Continue South another half mile (approx) and the road makes a sharp right hand turn (towards West). Follow this for another half mile (approx).

6. When "Tierra Del Sol Road" makes a sharp left hand turn (towards the South), you'll see a small sign that says "SDAA" pointing to the right and two dirt roads, one going West and one going North. Turn right onto the North bound dirt road, this is "Tierra De Luna".

7. Go North on the dirt road and turn right into the SDAA site (about 400 yards up the road). The entrance is marked by a sign, a red steel gate and a chain link gate. Public parking is to the left as you enter. See parking instructions on next page.

Where to Park at Tierra Del Sol

Tierra De Luna Road (DIRT)

Smoking Area

If you are NOT setting up a telescope, and only visiting, park your car here, facing South (back in).

If you are setting up a telescope, park your car facing North (back in) on the North side of the pad.

CONCRETE PAD - TELESCOPES HERE

Men
RESTROOMS
Women

If you are setting up a telescope, park your car facing North (back in) on the North side of the pad.

SPACE.com's Star Party Survival Guide

By Wil Milan

Special to SPACE.com

SPACE.com's "Star-Party Survival Guide" provides you with useful tips to help make the most of your stargazing party experience this summer.

Come prepared

Be aware that many star parties are held in remote locations where there are no bathroom facilities. Ask the party organizers what facilities are available and make plans accordingly. Be sure to bring some water with you and perhaps some light snacks. Being active late at night makes most people hungry. Even if you do not get hungry you will certainly need something to drink, particularly on warm summer nights. In most parts of the country you'll also want to carry bug repellent. Many insects are most active at night, and in some places mosquitoes can eat you alive in an hour. Bug repellent is available at sporting goods stores; the rub-on types seem to work better than the sprays.

What to wear

Do bring warm clothes -- warmer than you think you might need. Most people are not used to being outside late at night and you may find it is a lot colder than you expected. Wear sturdy footwear, such as running shoes or hiking boots. In the dark it's hard to see what is underfoot and what you are stepping on, so your feet should be protected from sharp rocks, cactus or whatever inhabits the ground in at that site.

Children welcome

Star parties are family affairs and children are welcome. If you do bring children, be sure they stay with you at all times. If they're very small and they start crying, take them back to your car until they can be quieted down. Many children become cranky if they stay up too late, but are happy to sleep in the car if they have a blanket and their favorite toys.

When to arrive

It's important to arrive at the star party before dark. There are always a few stragglers who arrive after dark, but that is frowned upon because those already there don't like headlights shining at them after their vision has become dark-adapted. When you arrive after dark, you also run the risk of not finding the place at all: Many sites that are easy to find in daytime can be nearly impossible to find in the dark. If you arrive before dark you'll also have a chance to see all the scopes being set up (often interesting to watch, particularly with the really huge scopes). You'll find that most astronomers are quite talkative and willing to discuss the telescopes and how they work, particularly if you offer to help them set up. If you do have to arrive after dark, turn off your headlights far enough away from the viewing area so they won't disturb anyone. Drive in the rest of the way using your parking lights. When you first turn off your headlights the parking lights may seem inadequate, but if you give yourself a minute to become more dark-adapted you'll find you can drive just fine with just the parking lights.

Bright lights, big no-no

A car's dome and other interior lights are amazingly bright to someone whose vision is dark-adapted and you will greatly annoy a lot of people if you pop open a door and light up the countryside. Be sure you know how to disable these lights in your car before you head out to the star party. On some cars there's a simple switch for this, on others you need to yank the bulbs out of the fixtures, or even pull a fuse. As a last resort you can tape a piece of cardboard over the dome and door lights. (On some automobiles this is the only solution.) A note about exterior running lights: Some cars, General Motors models in particular, have "running lights" -- special lights that are similar to headlights, but always on. If you own such a vehicle it can cause some difficulty at a star party because you cannot turn them off. Try to use another vehicle if possible and, if not, try to park away from the group so that the lights do not disturb others. You may find it very handy to bring a small red light. Light at the red wavelength does not affect night vision, so at a star party you'll find that it is the only one used. You are

not obligated to bring your own red light, but it will be very handy for seeing your way around in the dark. You can find these at astronomy shops or at sporting goods stores. Many are just small flashlights equipped with red filters. If you do purchase a red light, don't make it a very bright one because that will defeat the purpose. A dim light works well, and you'll be amazed how bright it is once your eyes become dark-adapted.

Observing at a star party

Once the observing is underway, feel free to go from scope to scope and talk with everyone. They'll be more than happy to let you look through their scopes, and will also be glad to talk about the telescope, what they're looking at and anything else that interests you. This kind of discussion and chit-chat is expected at star parties, particularly from visitors; don't feel that you are imposing on them. Most star party attendees will "make the rounds" at least once during the night to see what others are looking at and what kind of equipment they brought; feel free to join in.

Likewise, don't be afraid to ask questions about what's in the sky, where different constellations are or anything else. Astronomers, particularly amateur astronomers, are used to questions like that and they typically enjoy explaining such things to other people. Where it is dark and free of ambient light there is an interesting effect: even if you know the location of some constellations, you may find that under a dark sky there are so many stars that you can't pick out the constellations. In the days before light pollution, this is how everyone saw the sky, filled with thousands of stars. For modern city dwellers, however, it may take a bit of practice to find the constellations again.

Leaving a star party:

When you're ready to leave, don't just start the engine and drive off. Let others know that you're planning to leave and ask if anyone is in the middle of an astrophoto exposure. If anyone is, the etiquette is to wait until the exposure is finished before starting the engine or turning on any lights. Even just stepping on the brake will light the very bright taillights on the car, so be careful not to step on the brake while getting into or out of the vehicle. It's a good idea to ask the organizers of the star party when most people will be leaving so you can plan accordingly. Most club star parties usually break up a little after midnight, but that varies from club to club. It also varies with the moon. If the moon rises during the night, most people will start packing as soon as they see the horizon glow that precedes the moonrise. When you do leave, use your parking lights instead of headlights, just as when arriving after dark.

Enjoying the experience

Most of all, enjoy the night sky and the company. While they are not loud and festive, star parties are very enjoyable social affairs that are also quite educational. Contact a local astronomy club and go see all the things that are right above you every night, which most people have never seen. It's an experience you'll truly enjoy.

How To Make A Red Filtered Flashlight

Buy a flashlight that has a removable lens assembly, it doesn't have to be expensive, or very bright, a two "C" cell one should be fine. If you feel you'd like a smaller one, or of higher quality, then buy one of the aluminum body types that have a focusable beam, such as a Mag-Lite or Brinkman.

Unscrew the lens assembly from the flashlight body. Snap out or unscrew the reflector that holds the bulb. Now snap out the clear plastic lens. Using this as a template, cut out a circle of the clear red vinyl that we provide you in your Handbook. If you want the light an even dimmer, deeper red, cut out two pieces.

Now push the clear lens back into the lens holder, followed by the clear red filter(s). Now snap in the reflector assembly and screw the assembly back onto the flashlight body. Turn on your new red beam flashlight!

If you wish to purchase more of the filter material, it's "Transparent Red Vinyl" and is available in 2' x 4' sheets for about \$13.00 each at:

Ridout Plastics
5535 Ruffin Road
